Career Objective

A highly motivated and enthusiastic second-year BTech student specializing in Artificial Intelligence and Data Science, with a keen interest in data analytics. Eager to apply theoretical knowledge to real-world scenarios, develop hands-on skills, and grow as a data analyst through continuous learning and practical experience.

Education

B.Tech – Artificial Intelligence and Data Science
Francis Xavier Engineering College, Vannerpettai
Expected Graduation: 2027

HSC – St. Ignatius Convent Hr. Sec. School
State Board, 2023
Percentage: 88%

SSLC – St. Ignatius Convent Hr. Sec. School
State Board, 2021
Percentage: 85%

Technical Interests

- Data Analytics
- Python Programming
- Data Visualization (Excel, Matplotlib – learning)
- Basic Statistics
- SQL (beginner level)

Projects

Wine Quality Prediction (in progress)

Tools: Python, Pandas, Scikit-learn

A machine learning project to predict the quality of wine based on chemical attributes. Built using Python libraries and classification models.

Certifications

- Completed "Introduction to Data Analytics" – Coursera
- Completed multiple short courses on Udemy in Python and data-related topics
- Gained practical certificates from online platforms (Coursera, Udemy, etc.)

Skills & Strengths

- Strong interest in data analysis and problem-solving
- Basic Python knowledge
- Curious and self-driven learner
- Good communication and collaboration skills
- Time management and adaptability

Languages Known

- Tamil (Native)
- English (Proficient)
